

Honda Civic 2023

Power unit

The 2023 Civic has a new Power Control Unit and an Intelligent Power Unit, which can produce 181 horsepower and 232 lb-ft of torque.

Mode drive system

The 2023 Civic has a multi-mode drive system with two primary settings. The Sport mode has smoother shifts and better fuel economy.

Fuel injection

The 2023 Civic e:HEV has a 2.0-liter naturally aspirated Atkinson cycle gasoline direct injection engine.

Remote engine start

The Civic sedan has remote engine start, which can start the engine and prepare the automatic climate control system.

Interior comfort and convenience features

The 2023 Civic has a spacious cabin with ample legroom and headroom.

Interior technology

The 2023 Civic hatchback has a stylish and luxurious interior with the latest technology.

Safety technology

The 2023 Civic comes standard with the Honda Sensing safety suite, which includes adaptive cruise control, automatic emergency braking, lane-keeping assistance, and road departure mitigation.
